FAQ:

What specific qualifications or prerequisites are needed for participants before enrolling in the course?

There are no strict prerequisites. However, professionals with basic knowledge of operations or business strategy will benefit the most.

How long is each day's session, and is there a total number of hours required for the entire course?

Each day's session is generally structured to last around 4-5 hours, with breaks and interactive activities included. The total course duration spans five days, approximately 20-25 hours of instruction.

What is the difference between lean operations and agile operations techniques?

Lean operations focus on eliminating waste and streamlining processes, while agile operations techniques emphasise adaptability and responsiveness to change. Both are integrated in this course to build a resilient operations strategy.

How This Course is Different from Other Strategic Operations Management Courses:

This course stands out through its strategic integration of practical methods, cross-sector examples, and systems thinking. Unlike generic operations programmes, this course Strategic Operations Management thinking drawn from integrates lean operations, agile operations techniques, and innovation in operations with strategic outsourcing, performance metrics, and transformation process optimisation. It equips professionals to lead future-ready operations across diverse industries by aligning enterprise operations frameworks with competitive business objectives. Through experiential learning and real-world case studies, participants acquire a solid foundation to drive sustainable, innovative, and strategic operations management across all levels of the organisation.
