المرجع: 36349_43448 التاريخ: 28 Dec 2026 - 01 Jan 2027 الموقع: عمان الرسوم: Euro 4100

Course Overview:

This course is designed to equip participants with the knowledge and confidence to pass the LEED Green Associate exam on their first attempt. It covers essential green building principles, including sustainable site planning, water efficiency, energy considerations, and indoor environmental quality.

Through structured quizzes and interactive sessions, participants will learn the green building certification process, from initial planning to certification levels. Guided by a LEED Green Associate study guide, learners will gain insights into building credits, certification benefits, and the value of LEED certification, positioning them for success in the green building industry.

Target Audience:

- Architects, Urban Planners, and Landscape Professionals
- Mechanical, Electrical, and Plumbing MEP Engineers
- Civil Engineers and Construction Professionals
- Environmental Consultants and Sustainability Advisors
- Site Engineers and Project Managers in green construction

Targeted Organizational Departments:

- Sustainability and Environmental Management
- Facilities and Operations Management
- Design and Architecture Departments
- Project Management and Construction Teams
- Compliance and Quality Assurance

Targeted Industries:

- Real Estate Development and Construction
- Urban Planning and Municipal Organizations
- Engineering and Architecture Firms
- Environmental and Sustainability Consulting
- Government and Regulatory Bodies

Course Offerings:

By the end of this course, participants will be able to:

- Understand the LEED Rating System and sustainable building strategies.
- Demonstrate comprehensive knowledge of LEED GA certification requirements.
- Apply sustainable site planning and water efficiency practices in green building.
- Analyze energy and atmosphere guidelines and indoor environmental quality metrics.
- Recognize LEED GA certification levels and their value in the green building industry.

Training Methodology:

This course employs an engaging approach to enhance participant involvement and retention. It includes interactive sessions, case studies, and group activities to deepen understanding of the LEED Rating System and sustainable building strategies. Daily quizzes will reinforce key concepts, preparing participants for the LEED GA exam. Real-world examples will clarify green building principles, and end-of-day reflection sessions will help solidify understanding and address any questions.
