FAQ:

What specific qualifications or prerequisites are needed for participants before enrolling in the course?

No formal qualifications are required; however, the course is ideal for professionals with roles in business development, strategic planning, operations, or quality management. A basic understanding of organizational planning or quality assurance concepts will help participants maximize the value of this course.

How long is each day's session, and is there a total number of hours required for the entire course?

Each day's session is generally structured to last around 4-5 hours, with breaks and interactive activities included. The total course duration spans ten days, approximately 40-45 hours of instruction.

What is the difference between Total Quality Management TQM and Lean Six Sigma, and why are both covered in the course?

This is a common question. TQM focuses on embedding a culture of quality across all functions of an organization, while Lean Six Sigma emphasizes measurable process improvements using data and statistical tools. This course includes both because successful strategic planning depends on both cultural alignment and performance metrics.

-You will learn how to apply each approach at different stages of business development and execution, using case based learning to clarify their distinct value.

How This Course is Different from Other Strategic Business Planning or Quality Improvement Courses:

The Strategic Business Planning & Quality Improvement Masterclass offers a rare integration of two essential disciplines—business plan development and operational quality enhancement—into one cohesive, high-impact experience. While most business strategy courses stop at financial projections and stakeholder analysis, and most quality training programs focus narrowly on compliance or tools, this course bridges the gap.

Using insights drawn from both business development and quality management principles as highlighted in the -embed quality- but also draft comprehensive business plans original training materials, participants will not only through Lean, Six Sigma, TQM, and ISO 9001:2015. Real-world case studies, stakeholder riven thinking engagement simulations, and integrated pitch sessions bring these frameworks to life.

to strategic and practical insights and guided exposure Learners won't receive a box of tools—instead, they'll gain quality frameworks, enabling them to confidently apply the most appropriate tools in real work scenarios. This for professionals seeking to lead both strategic planning dual certification pathway course stands out by offering a initiatives and quality improvement transformations in their organizations.

It's more than a course. It's a transformation—from planning to execution, from good to exceptional.
