FAQ:

What specific qualifications or prerequisites are needed for participants before enrolling in the course? •

Participants do not need prior certification but should have some background in security management, risk assessment, or supply chain operations.

How long is each day's session, and is there a total number of hours required for the entire course? •

Each day's session lasts approximately 4-5 hours, with the entire course spanning 20-25 hours over five days.

How does ISO 28000 certification benefit professionals? •

ISO 28000 certification enhances career opportunities by validating expertise in supply chain security, risk management, and compliance.

How This Course is Different from Other ISO 28000 Training Courses:

This program takes a complete approach to supply chain security management, unlike standard ISO 28000 training courses. It integrates business continuity strategies, compliance frameworks, and risk mitigation techniques into a five-day interactive learning experience. Participants gain hands-on experience in implementing ISO 28000 and prepare for lead implementer and lead auditor certification exams.
