Course Overview:

The "ISO 45001 Lead Auditor Certification Course: Master OH&S Auditing and Compliance Skills" is designed to equip professionals with the critical expertise to lead and conduct ISO 45001 audits effectively. Based on international best practices and incorporating ISO 19011 and ISO/IEC 17021-1 standards, this intensive course develops both technical audit capabilities and leadership skills. Participants will explore essential topics, including ISO 45001 clauses 4 to 10, risk-based auditing, compliance audit planning, audit evidence collection, nonconformity reporting, and corrective action evaluation. With a focus on occupational health and safety management systems OHSMS, the course combines theory with hands-on audit simulation activities, enhancing readiness for real-world ISO audits. On completion, attendees will be prepared for the ISO 45001 certification exam and eligible for globally recognized credentials, including PECB Certified Lead Auditor. This course supports professional development in health and safety, risk management, and international auditor certification.

How This Course is Different from Other ISO 45001 Lead Auditor Courses:

Unlike standard auditor courses, this program immerses participants in practical audit simulations, aligning with both ISO 19011 and ISO/IEC 17021-1 audit standards. It goes beyond the basics by training professionals on leadership in audits, international certification standards, and real-world case analysis. Our course integrates advanced audit techniques such as risk-based and evidence-based auditing while offering resources like CPD certified hours, mock exam access, and post-training consultation. Delivered by certified professionals, it ensures that each participant not only understands the theory but also builds competence in applying ISO 45001 audit techniques across industries. This is more than a training—it's your gateway to becoming a globally recognized ISO 45001 Lead Auditor.
